

ABSTRACT

AYU SUTRAVIANI TALIB. The role of nurses in patient safety at the Otanaha Gorontalo Regional Public Hospital. Supervised by SABIRIN B. SYUKUR as chairman and FADLI SYAMSUDIN as member.

Patient safety is a top priority in health services and nursing services as well as the most important aspect of quality management. The Objective of research was to determine the role of nurses in patient safety. The design is descriptive research. The population are 34 nurses who are in the pediatric, surgical and internal rooms. The samples are 34 nurses or total sampling. The results showed the role of nurses in the good category was 31 people, based on the dimensions of the role of care givers, they are 34 people, most of them were good, 31 coordinator dimension was mostly good, and from the collaborator dimension, 31 people were mostly good. On average, 34 nurses carry out six (6) patient safety goals. Therefore it was concluded most of the roles of nurses at Otanaha Hospital were in the good category and carried out six (6) goals of patient safety. Suggestions are expected for nurses to continue to carry out the six (6) goals of patient safety honestly and to improve better service.

ABSTRAK

AYU SUTRAVIANI TALIB. Peran perawat dalam keselamatan pasien di Rumah Sakit Umum Daerah Otanaha Gorontalo. Dibimbing oleh SABIRIN B. SYUKUR sebagai ketua dan FADLI SYAMSUDIN sebagai anggota.

Keselamatan pasien dijadikan prioritas yang utama dalam pelayanan kesehatan dan pelayanan keperawatan sekaligus sebagai aspek paling penting dari manajemen yang berkualitas. Tujuan penelitian untuk mengetahui peran perawat dalam keselamatan pasien. Desain penelitian deskriptif. Jumlah populasi sebanyak 34 perawat yang berada di ruang anak, bedah dan interna. Jumlah sampel sebanyak 34 perawat atau *total sampling*. Hasil penelitian menunjukkan bahwa peran perawat dengan kategori baik sebanyak 31 orang, berdasarkan pada dimensi peran perawat *care giver* sebagian besar baik sebanyak 34 orang, dimensi *coordinator* sebagian besar baik sebanyak 31 orang dan dari dimensi *collaborator* sebagian besar baik sebanyak 31 orang. Rata-rata 34 orang perawat melakukan enam (6) *goals patient safety*. Sehingga disimpulkan bahwa sebagian besar peran perawat di RSUD Otanaha berada pada kategori baik dan melakukan enam (6) *goals patient safety*. Saran diharapkan perawat agar tetap melakukan enam (6) *goals patient safety* secara jujur demi keselamatann pasien serta untuk meningkatkan pelayanan yang lebih baik.

Kata Kunci : *Keselamatan Pasien, Peran Perawat.*
