ABSTRACT

NURFATNI. The Relationship Between Emotional Intelligence and Family Spiritual Intelligence and the Way of Families Care for Schizophrenia Patients at Home in Tilamuta District, Boalemo Regency. Supervisor I ABD KADIM MASAONG and Supervisor II FIRMAWATI.

Schizophrenia is a serious mental illness. This disease is caused by genetic factors, neurochemistry, impaired concentration of brain neurotransmitters, changes in brain cell receptors, and structural brain abnormalities. The aim of the research to determine a relationship between emotional intelligence and family spiritual intelligence and the way families care for schizophrenia patients at home in Tilamuta District, Boalemo Regency. The type of research used is quantitative research, analytical descriptive method with a cross-sectional design, namely the researcher makes observations. The population was 197 respondents with a sample of 68 respondents. Data analysis uses Regression Test. The result is the constant value (a) is 1,906. The constant value is positive, meaning that the variable value of emotional intelligence and spiritual intelligence is considered constant or equal to zero, so the way to treat schizophrenia patients at home will be better. The X1 coefficient value is 0.200. The coefficient value X1 is positive, means that the relationship between emotional intelligence and how to treat schizophrenia patients at home is positive and quite strong. The X2 coefficient value is 0.288. The X2 coefficient value is positive, meaning that the relationship between spiritual intelligence and how to treat schizophrenia patients at home is positive and quite strong. Based on the results of the R2 Square test, the emotional intelligence variable (X1) is 0.820 or 82.0%, which means the correlation coefficient value is very strong, while the results obtained by the R2 Square value of the spiritual intelligence variable (X1) are 0.100 or 100.0%, which means the correlation coefficient value perfect. The conclusion, there is a significant relationship between emotional intelligence and how to care for families of schizophrenia patients at home. The p value obtained = 0.014, where the p value is smaller than $\alpha = 0.05$. There is a significant relationship between emotional intelligence and how to care for families of schizophrenia patients at home. Obtained p value = 0.000, where the p value is smaller than $\alpha = 0.05$. It is recommended that the government, especially the health service, handle the families of schizophrenia patients.

Keywords: Emotional Intelligence and Spiritual Intelligence; Schizophrenia

ABSTRAK

NURFATNI. Hubungan Antara Kecerdasan Emosional Dan Kecerdasan Spritual Keluarga Dengan Cara Keluarga Merawat Pasien Skizofrenia Dirumah Di Kecamatan Tilamuta Kabupaten Boalemo. Pembimbing I ABD KADIM MASAONG dan Pembimbing II FIRMAWATI.

Skizofrenia merupakan penyakit mental yang serius. Penyakit ini disebabkan oleh faktor genetik, neurokimia, gangguan konsentrasi neurotransmiter otak, perubahan reseptor sel-sel otak, dan kelainan otak struktural. Tujuan penelitian adalah apakah ada hubungan antara kecerdasan emosional dan kecerdasan spritual keluarga dengan cara keluarga merawat pasien Skizofrenia dirumah di Kecamatan Tilamuta kabupaten Boalemo. Jenis penelitian yang digunakan adalah penelitian kuantitatif, metode Deskriptif Analitik dengan rancangan crosectional yaitu peneliti melakukan observasi. Populasi berjumlah 197 responden dengan sampel penelitian ini berjumlah 68 responden. Analisis data menggunakan Uji *Regresi*. Hasil penelitian Nilai konstanta (a) sebesar 1.906 Nilai konstanta bernilai positif artinya nilai variabel kecerdasan emosional dan kecerdasan spritual dianggap konstan atau sama dengan nol, maka cara merawat pasien Skizofrenia di Rumah akan semakin baik. Nilai koefisien X1 sebesar 0,200. Nilai koefisien X1 bernilai positif artinya hubungan kecerdasan emosional dengan cara merawat pasien Skizofrenia di Rumah bersifat positif dan cukup kuat. Nilai koefisien X2 sebesar 0,288. Nilai koefisien X2 bernilai positif artinya hubungan kecerdasan spritual dengan cara merawat pasien Skizofrenia di Rumah bersifat positif dan cukup kuat. Berdasarkan hasil uji R^2 *Square* variabel kecerdasan emosional (X1) sebesar 0,820 atau 82,0% yang artinya nilai Koefesien korelasi sangat kuat sedangkan hasil yang diperoleh nilai R^2 *Square* variable kecerdasan spritual (X1) sebesar 0,100 atau 100,0% yang artinya nilai Koefesien korelasi sempurna. Simpulan ada hubungan kecerdasan emosional yang signifikan dengan cara merawat keluarga pasien keluarga Skizofrenia di Rumah. Diperoleh nilai *p value* = 0,014, dimana nilai *p value* lebih kecil dari α = 0,05. Ada hubungan kecerdasan emosional yang signifikan dengan cara merawat keluarga pasien keluarga Skizofrenia di Rumah. Diperoleh nilai *p value* = 0,000, dimana nilai *p value* lebih kecil dari α = 0,05. Disarankan terhadap pemerintah khusunya dinas kesehatan dalam menangani keluarga pasien Skizofrenia.

Kata Kunci: Kecerdasan Emosional dan Kecerdasan Spritual; Skizoprenia
